SCHLUMBERGER LIMITED AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

1. Basis of Presentation

The accompanying unaudited consolidated financial statements of Schlumberger Limited and its subsidiaries (Schlumberger) have been prepared in accordance with generally accepted accounting principles in the United States of America for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of Schlumberger management, all adjustments considered necessary for a fair statement have been included in the accompanying unaudited financial statements. All intercompany transactions and balances have been eliminated in consolidation. Operating results for the nine-month period ended September 30, 2017 are not necessarily indicative of the results that may be expected for the full year ending December 31, 2017. The December 31, 2016 balance sheet information has been derived from the Schlumberger 2016 audited financial statements. For further information, refer to the *Consolidated Financial Statements* and notes thereto included in the Schlumberger Annual Report on Form 10-K for the year ended December 31, 2016, filed with the Securities and Exchange Commission on January 25, 2017.

New Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2014-09, *Revenue from Contracts with Customers*. This ASU amends the existing accounting standards for revenue recognition and is based on the principle that revenue should be recognized to depict the transfer of goods or services to a customer at an amount that reflects the consideration a company expects to receive in exchange for those goods or services. Schlumberger will adopt this ASU on January 1, 2018. Schlumberger has concluded that the adoption of this ASU will not have a material impact on its consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-02, *Leases*. This ASU requires lessees to recognize a right of use asset and lease liability on the balance sheet for all leases, with the exception of short-term leases. Schlumberger will adopt this ASU on January 1, 2019. Based on its current lease portfolio, Schlumberger estimates that the adoption of this ASU will result in approximately \$1.3 billion of additional assets and liabilities being reflected on its *Consolidated Balance Sheet*.

2. Charges and Credits

Schlumberger recorded the following charges and credits during the first nine months of 2017:

Third quarter 2017:

 In connection with Schlumberger's 2016 acquisition of Cameron International Corporation ("Cameron") (See Note 4 – Acquisition of Cameron), Schlumberger recorded \$49 million of charges relating to employee benefits, facility closures and other merger and integration-related costs. These charges are classified in Merger & integration in the Consolidated Statement of Income (Loss).

Second quarter 2017:

During the second quarter of 2017, Schlumberger entered into a financing agreement with its primary customer in Venezuela. This agreement resulted in the exchange of \$700 million of outstanding accounts receivable for a promissory note with a three-year term that bears interest at the rate of 6.50% per annum. Schlumberger recorded this note at its estimated fair value on the date of the exchange, which resulted in a charge of \$460 million. Schlumberger is accounting for the promissory note as an available-for-sale security reported at fair value in *Other Assets*, with unrealized gains and losses included as a component of *Accumulated other comprehensive loss*. The fair value of the promissory notes, which was \$184 million as of September 30, 2017, is based on management's estimate of pricing assumptions that market participants would use.

During the second quarter of 2017, Schlumberger also entered into discussions with another customer relating to certain of its outstanding accounts receivable. As a result of these ongoing discussions, Schlumberger recorded a charge of \$50 million to adjust these receivables to their estimated net realizable value.

These charges are classified in Impairments & other in the Consolidated Statement of Income (Loss).

• In connection with Schlumberger's acquisition of Cameron, Schlumberger recorded \$81 million of charges relating to employee benefits, facility closures and other merger and integration-related costs. These charges are classified in *Merger & integration* in the *Consolidated Statement of Income (Loss)*.

First quarter of 2017:

• In connection with Schlumberger's acquisition of Cameron, Schlumberger recorded \$82 million of charges relating to employee benefits, facility closures and other merger and integration-related costs. These charges are classified in *Merger & integration* in the *Consolidated Statement of Income (Loss)*.

The following is a summary of the charges and credits recorded during the first nine months of 2017:

Schlumberger recorded the following charges and credits during the first nine months of 2016:

Third quarter of 2016:

In connection with Schlumberger's acquisition of Cameron, Schlumberger recorded \$88 million of charges, classified in *Merger & integration* in the *Consolidated Statement of Income (Loss)*, relating to employee benefits, facility closures; and other merger and integration-related costs. Additionally, Schlumberger recorded \$149 million of charges relating to the amortization of purchase accounting adjustments associated with the write-up of acquired inventory to its estimated fair value, which is classified in *Cost of sales* in the *Consolidated Statement of Income (Loss)*. This amortization was historically presented as a component of *Merger & integration* in the prior year; however, Schlumberger reclassified this prior period item to *Cost of Sales* in the current year.

Second quarter of 2016:

- As a result of the persistent unfavorable oil and gas industry market conditions that continued to deteriorate in the first half of 2016, and the related impact on 2016 first-half operating results and expected customer activity levels, Schlumberger determined that the carrying values of certain assets were no longer recoverable and took certain decisions that resulted in the following impairments and other charges, all of which are classified in *Impairments & other* in the *Consolidated Statement of Income (Loss)*:
 - \$646 million of severance costs associated with further headcount reductions.
 - \$209 million impairment of pressure pumping equipment in North America.
 - \$165 million impairment of facilities in North America.
 - \$684 million of other fixed asset impairments primarily relating to other underutilized equipment.
 - \$616 million write-down of the carrying value of certain inventory to its net realizable value.
 - \$198 million impairment of certain multiclient seismic data, largely related to the US Gulf of Mexico.
 - \$55 million of other costs, primarily relating to facility closure costs.
- In connection with Schlumberger's acquisition of Cameron, Schlumberger recorded \$185 million of charges, classified in *Merger & integration* in the *Consolidated Statement of Income (Loss)*, consisting of the following: \$47 million relating to employee benefits for change-in-control arrangements and retention bonuses; \$45 million of transaction costs, including advisory and legal fees; \$40 million of facility closure costs, and \$53 million of other merger and integration-related costs. Additionally, Schlumberger recorded \$150 million of charges related to the amortization of purchase accounting adjustments associated with the write-up of acquired inventory to its estimated fair value, which is classified in *Cost of sales* in the *Consolidated Statement of Income (Loss)*.

There were no charges or credits recorded during the first quarter of 2016.

The following is a summary of the charges and credits recorded during the first nine months of 2016:

4. Acquisition of Cameron

On April 1, 2016, Schlumberger acquired all of the outstanding shares of Cameron, a leading provider of flow equipment products, systems and services to the oil and gas industry worldwide. Schlumberger issued approximately 138 million shares of its common stock, which were valued at \$9.9 billion at the time of closing, and paid cash of \$2.8 billion.

Supplemental Pro Forma Financial Information

The following supplemental pro forma results of operations assume that Cameron had been acquired as of January 1, 2015. The supplemental pro forma financial information was prepared based on the historical financial information of Schlumberger and Cameron and has been adjusted to give effect to pro forma adjustments that are both directly attributable to the transaction and factually supportable. The pro forma amounts reflect certain adjustments to intangible asset amortization expense, interest and income taxes resulting from purchase accounting. The pro forma amounts also reflect adjustments to the 2016 results to exclude the amortization of purchase accounting adjustments associated with the write-up of acquired inventory to its estimated fair value and other merger and integration costs of \$177 million and \$430 million, net of taxes, for the three and nine months ended September 30, 2016, respectively.

The supplemental pro forma financial information presented below does not include any anticipated cost savings or the expected realization of other synergies associated with this transaction. Accordingly, this supplemental pro forma financial information is presented for informational purposes only and is not necessarily indicative of what the actual results of operations of the combined company would have been had the acquisition occurred on January 1, 2015, nor is it indicative of future results of operations.

The estimated fair value of Schlumberger's *Long-term Debt*, based on quoted market prices at September 30, 2017 and December 31, 2016, was \$16.2 billion and \$16.8 billion, respectively.

Borrowings under the commercial paper program at September 30, 2017 were \$2.4 billion, all of which was classified within *Long-term Debt* in the *Consolidated Balance Sheet*. At December 31, 2016, borrowings under the commercial paper program were \$2.6 billion, of which \$2.4 billion was classified within *Long-term debt* and \$0.2 billion was classified in *Short-term borrowings and current portion of long-term debt* in the *Consolidated Balance Sheet*.

10. Derivative Instruments and Hedging Activities

Schlumberger is exposed to market risks related to fluctuations in foreign currency exchange rates and interest rates. To mitigate these risks, Schlumberger utilizes derivative instruments. Schlumberger does not enter into derivative transactions for speculative purposes.

Interest Rate Risk

Schlumberger is subject to interest rate risk on its debt and its investment portfolio. Schlumberger maintains an interest rate risk management strategy that uses a mix of variable and fixed rate debt combined with its investment portfolio, and occasionally interest rate swaps, to mitigate the exposure to changes in interest rates.

During 2013, Schlumberger entered into a cross currency swap for a notional amount of $\notin 0.5$ billion in order to hedge changes in the fair value of Schlumberger's $\notin 0.5$ billion 1.50% Guaranteed Notes due 2019. Under the terms of this swap, Schlumberger will receive interest at a fixed rate of 1.50% on the euro notional amount and pay interest at a floating rate of three-month LIBOR plus approximately 64 basis points on the US dollar notional amount.

This cross currency swap is designated as a fair value hedge of the underlying debt. This derivative instrument is marked to market with gains and losses recognized currently in income to largely offset the respective gains and losses recognized on changes in the fair value of the hedged debt.

At September 30, 2017, Schlumberger had fixed rate debt of \$13.0 billion and variable rate debt of \$4.2 billion after taking into account the effect of the swap.

Short-term investments were \$3.3 billion at September 30, 2017. The carrying value of these investments approximated fair value, which was estimated using quoted market prices for those or similar investments.

Foreign Currency Exchange Rate Risk

As a multinational company, Schlumberger conducts its business in over 85 countries. Schlumberger's functional currency is primarily the US dollar. However, outside the United States, a significant portion of Schlumberger's expenses is incurred in foreign currencies. Therefore, when the US dollar weakens (strengthens) in relation to the foreign currencies of the countries in which Schlumberger conducts business, the US dollar–reported expenses will increase (decrease).

Schlumberger is exposed to risks on future cash flows to the extent that the local currency is not the functional currency and expenses denominated in local currency are not equal to revenues denominated in local currency. Schlumberger is also exposed to risks on future cash flows relating to certain of its fixed rate debt that is denominated in currencies other than the functional currency. Schlumberger uses foreign currency forward contracts to provide a hedge against a portion of these cash flow risks. These contracts are accounted for as cash flow hedges, with the effective portion of changes in the fair value of the hedge recorded on the *Consolidated Balance Sheet* and in *Accumulated Other Comprehensive Loss*. Amounts recorded in *Accumulated Other Comprehensive Loss* are reclassified into earnings in the same period or periods that the hedged item is recognized in earnings. The ineffective portion of changes in the fair value of hedging instruments, if any, is recorded directly to earnings.

At September 30, 2017, Schlumberger recognized a cumulative net gain of \$4 million in *Accumulated other comprehensive loss* relating to revaluation of foreign currency forward contracts and foreign currency options designated as cash flow hedges, the majority of which is expected to be reclassified into earnings within the next 12 months.

Schlumberger is exposed to changes in the fair value of assets and liabilities that are denominated in currencies other than the functional currency. While Schlumberger uses foreign currency forward contracts and foreign currency options to economically hedge this exposure as it relates to certain currencies, these contracts are not designated as hedges for accounting purposes. Instead, the fair value of the contracts is recorded on the *Consolidated Balance Sheet*, and changes in the fair value are recognized in the *Consolidated Statement of Income (Loss)* as are changes in fair value of the hedged item.

At September 30, 2017, contracts were outstanding for the US dollar equivalent of \$3.6 billion in various foreign currencies, of which \$0.8 billion related to hedges of debt denominated in currencies other than the functional currency.

The fair values of outstanding derivative instruments were as follows:

| | | (Stated in millions) | | | | | | | | | |

| | \$ | 83 | \$ | 126 | | | | | | | |
| | | | | | | | | | | | |

The fair value of all outstanding derivatives was determined using a model with inputs that are observable in the market or that can be derived from, or corroborated by, observable data.

The effect of derivative instruments designated as fair value hedges and those not designated as hedges on the Consolidated Statement of Income (Loss) was as follows:

11. Contingencies

Schlumberger is party to various legal proceedings from time to time. A liability is accrued when a loss is both probable and can be reasonably estimated. Management believes that the probability of a material loss with respect to any currently pending legal proceeding is remote. However, litigation is inherently uncertain and it is not possible to predict the ultimate disposition of any of these proceedings.

Reservoir Characterization Group

Reservoir Characterization Group revenue of \$1.8 billion increased 1% sequentially primarily due to seasonally higher Wireline and Testing & Process activities in the Russia & Central Asia and Norway & Denmark GeoMarkets. This increase was partially offset by lower WesternGeco multiclient license sales, which declined \$55 million, following the strong sales in Mexico during the previous quarter.

Pretax operating margin of 18% was 56 basis points (bps) higher sequentially as the increased contribution from high-margin Wireline activities was offset by reduced profitability in WesternGeco due to lower multiclient sales.

Drilling Group

Drilling Group revenue of \$2.1 billion increased 1% sequentially due to improved directional drilling-related revenue in North America land.

Pretax operating margin of 14% was essentially flat sequentially.

Production Group

Production Group revenue of \$2.9 billion was 15% higher sequentially primarily from continued market share gains in the hydraulic fracturing market in North America land.

Pretax operating margin of 10% increased 97 bps sequentially due to increased activity and improved pricing on land in North America.

Cameron Group

Cameron Group revenue of \$1.3 billion increased 3% sequentially primarily due to higher product sales in Surface Systems in North America land.

Pretax operating margin of 15% increased 116 bps sequentially, due mainly to increasing profitability on higher product sales and improved pricing in Surface Systems and Valves & Measurement in North America land.

(4) Charges and credits are described in detail in Note 2 to the Consolidated Financial Statements.

Certain prior period items have been reclassified to conform to the current period presentation.

Third-quarter 2017 revenue of \$7.9 billion increased 13% year-on-year. North America land rig count increased more than 90% versus the same period last year, while the international land rig count increased 3%. The North America offshore rig count decreased by 13%, while the international offshore rig count was 4% lower. Driven by the accelerated land activity growth in North America, Production Group revenue increased 37% year-on-year while Reservoir Characterization Group revenue increased by 6% due to increased Wireline activities and Testing & Process projects. Drilling Group revenue increased by 5% and Cameron Group revenue declined 3%.

Third-quarter 2017 pretax operating margin increased 178 bps to 13% due to improved profitability in North America driven by accelerated land activity growth that benefited the Production and Drilling Groups. As a result, Production Group pretax operating margin expanded 552 bps to 10%, while the Drilling Group increased 339 bps to 14%. Reservoir Characterization Group pretax operating margin declined 217 bps to 18% and the Cameron Group declined 110 bps to 15%.

Reservoir Characterization Group

Third-quarter 2017 revenue of \$1.8 billion increased 6% year-on-year primarily due to higher Wireline activities in North America land and Russia and increased Testing & Process revenue on projects in the Middle East & Asia Area.

Year-on-year, pretax operating margin declined 217 bps to 18% as the increased revenue was offset by higher project costs in Testing & Process.

Drilling Group

Third-quarter 2017 revenue of \$2.1 billion increased 5% year-on-year primarily due to higher demand for directional drilling technologies on land in North America.

Year-on-year, pretax operating margin increased 339 bps to 14% primarily due to improved profitability in North America due to accelerated land activity and improved pricing.

Production Group

Third-quarter 2017 revenue of \$2.9 billion increased 37% year-on-year, as a result of the accelerated land activity growth in North America that benefited the pressure pumping business.

Year-on-year, pretax operating margin increased 552 bps to 10% primarily as a result of improved profitability in North America due to accelerated land activity and improved pricing.

Cameron Group

Third-quarter revenue of \$1.3 billion declined 3% year-on-year due to a declining backlog for the long-cycle businesses of Drilling Systems and OneSubsea.

Pretax operating margin of 15% declined 110 bps primarily due to the decline in high-margin Drilling Systems project volumes.

- (3) Interest expense excludes amounts which are included in the segments' income (\$39 million in 2017; \$40 million in 2016).

(4) Charges and credits recorded are described in detail in Note 2 to the Consolidated Financial Statements.

Certain prior period items have been reclassified to conform to the current period presentation.

Nine-month 2017 revenue of \$22.3 billion increased 8% year-on-year. This included a full nine months of activity from the acquired Cameron businesses versus two quarters of activity for the same period in 2016. Excluding the impact of the Cameron Group, revenue for the nine months ended September 30, 2017 increased 3% year-on-year. The growth was primarily driven by North America where the land rig count increased 90% versus the same period last year.

Nine-month revenue for the Drilling Group declined 5% primarily driven by the 4% decline in the international rig count combined with Schlumberger's decision in April 2016 to reduce its activities in Venezuela to align operations with cash collections. Production

Group revenue increased 15% due to the accelerated land pressure pumping activity growth in North America, while the Reservoir Characterization Group revenue improved 4%.

Nine-month 2017 pretax operating margin was essentially flat at 12%, as improved profitability in North America due to the land activity growth that benefited the Production and Drilling Groups was offset by margin declines in the Reservoir Characterization and Cameron Groups.

Reservoir Characterization Group

Nine-month 2017 revenue of \$5.1 billion increased 4% year-on-year primarily due to higher WesternGeco and Testing & Process revenue on projects in the Middle East & Asia Area.

Year-on-year, pretax operating margin decreased 140 bps to 17% due to reduced profitability in Testing & Process as project costs increased.

Drilling Group

Nine-month 2017 revenue of \$6.2 billion decreased 5% year-on-year primarily due to the rig count declines internationally and in offshore North America combined with pricing pressure. Revenue also declined as a result of Schlumberger's decision in April 2016 to reduce its activities in Venezuela to align operations with cash collections.

Year-on-year, pretax operating margin increased 178 bps to 13% primarily due to improved profitability in North America due to accelerated land activity and improved pricing. This improvement was partially offset by the negative impact of reduced activity in Venezuela.

Production Group

Nine-month 2017 revenue of \$7.6 billion increased 15% year-on-year with most of the revenue increase attributable to the accelerated land activity growth in North America that benefited the pressure pumping business which grew 34%. Lower Schlumberger Production Management (SPM) production levels in Ecuador partially offset the revenue increase.

Year-on-year, pretax operating margin increased 238 bps to 8% as a result of improved profitability in North America due to the accelerated land activity and improved pricing. This was partially offset by reduced margins in SPM due to lower production in Ecuador.

Cameron Group

The Cameron Group contributed nine-month revenue of \$3.8 billion. Cameron Group revenue for the first nine months of 2016 included only two quarters of revenue following the closing of the acquisition in April 2016. Revenue in 2017 was impacted by a declining project backlog, particularly for the long-cycle businesses of Drilling Systems and OneSubsea.

Year-on-year, pretax operating margin of 14% decreased 224 bps as a result of lower Drilling Systems project volumes.

Interest and Other Income

Interest & other income consisted of the following:

Research & engineering and *General & administrative* expenses, as a percentage of *Revenue*, for the third quarter and nine months ended September 30, 2017 and 2016 were as follows:

| | Third Qua | rter | Nine Months | | |
|--------------------------|-----------|-----------|-------------|------|--|
| | 2017 | 2017 2016 | | 2016 | |
| Research & engineering | 2.4% | 3.6% | 2.7% | 3.6% | |
| General & administrative | 1.5% | 1.3% | 1.5% | 1.5% | |

Research & engineering costs for the third quarter of 2017 and the nine months ended September 30, 2017 have decreased as compared to the same periods in 2016 by \$64 million and \$155 million, respectively, as a result of cost control measures.

The effective tax rate for the third quarter of 2017 was 17.9% as compared to 5.1% for the same period of 2016. The charges described in Note 2 to the *Consolidated Financial Statements* decreased the effective tax rate for the third quarter of 2017 by one percentage point and by 11 percentage points for the same period of 2016. Excluding the impact of these charges, the effective tax rate increased as a result of the change in the geographic mix of earnings as Schlumberger generated a greater portion of its pretax earnings in North America during the third quarter of 2017 as compared to the same period last year.

The effective tax rate for the nine months ended September 30, 2017 was 26.2% as compared to 15.3% for the same period of 2016. The charges described in Note 2 to the *Consolidated Financial Statements* increased the effective tax rate for the nine months ended September 30, 2017 by eight percentage points and decreased the effective tax rate by one percentage point for the same period of 2016. Excluding the impact of these charges, the effective tax rate increased as a result of the change in the geographic mix of earnings as Schlumberger generated a greater portion of its pretax earnings in North America during the nine months ended September 30, 2017 as compared to the same period last year.

Charges and Credits

Schlumberger recorded charges during the first, second and third quarters of 2017 which are fully described in Note 2 to the *Consolidated Financial Statements*. The following is a summary of the charges recorded during the first nine months of 2017:

(Stated in millions)

During the third quarter of 2016, Schlumberger recorded \$237 million of charges associated with the acquisition of Cameron. During the second quarter of 2016, Schlumberger recorded \$2.573 billion of asset impairment and workforce reduction charges and \$334 million of charges associated with the acquisition of Cameron. There were no charges or credits recorded during the first quarter of 2016. These charges, which are summarized below, are more fully described in Note 2 to the *Consolidated Financial Statements*.

"Net debt" represents gross debt less cash, short-term investments and fixed income investments, held to maturity. Management believes that Net debt provides useful (1) information regarding the level of Schlumberger's indebtedness by reflecting cash and investments that could be used to repay debt. Net debt is a non-GAAP financial measure that should be considered in addition to, not as a substitute for or superior to, total debt.

(2)Includes depreciation of property, plant and equipment and amortization of intangible assets, multiclient seismic data costs and SPM investments.

(3)Includes severance payments of approximately \$347 million and \$770 million during the nine months ended September 30, 2017 and 2016, respectively.

(4)"Free cash flow" represents cash flow from operations less capital expenditures, SPM investments and multiclient seismic data costs capitalized. Management believes that free cash flow is an important liquidity measure for the company and that it is useful to investors and management as a measure of our ability to generate cash. Once business needs and obligations are met, this cash can be used to reinvest in the company for future growth or to return to shareholders through dividend payments or share repurchases. Free cash flow does not represent the residual cash flow available for discretionary expenditures. Free cash flow is a non-GAAP financial measure that should be considered in addition to, not as substitute for or superior to, cash flow from operations.

Key liquidity events during the first nine months of 2017 and 2016 included:

On July 18, 2013, the Schlumberger Board of Directors (the "Board") approved a \$10 billion share repurchase program to be completed at the latest by June 30, 2018. This program was completed during May 2017. On January 21, 2016, the Board approved a new \$10 billion share repurchase program for Schlumberger common stock. Schlumberger had repurchased \$223 million of shares under the new program as of September 30, 2017.

The following table summarizes the activity under these share repurchase programs:

(Stated in millions, except per share amounts) Total cost Total number Average price of shares of shares paid per purchased purchased share Nine months ended September 30, 2017 868 74.21 \$ 11.7 S Nine months ended September 30, 2016 \$ 662 9.5 \$ 69.64

Capital expenditures were \$1.5 billion during the first nine months of 2017 compared to \$1.4 billion during the first nine months of 2016. Capital expenditures for full-year 2017 are expected to be approximately \$2.1 billion as compared to expenditures of \$2.1 billion in 2016.

Schlumberger maintains an allowance for doubtful accounts in order to record accounts receivable at their net realizable value. Judgment is involved in recording and making adjustments to this reserve. Allowances have been recorded for receivables believed to be uncollectible, including amounts for the resolution of potential credit and other collection issues such as disputed invoices. Adjustments to the allowance may be required in future periods depending on how such potential issues are resolved, or if the financial condition of Schlumberger's customers were to deteriorate resulting in an impairment of their ability to make payments.

During weak economic environments or when there is an extended period of weakness in oil and gas prices, Schlumberger typically experiences delays in the payment of its receivables. However, Schlumberger has not had material write-offs due to uncollectible accounts receivable over the recent industry downturn. Schlumberger operates in more than 85 countries. As a large multinational company with a long history of operating in a cyclical industry, Schlumberger has extensive experience in working with its customers during difficult times to manage its accounts receivable. As of September 30, 2017, only five of those countries individually accounted for greater than 5% of Schlumberger's net receivable balance, of which only two (the United States and Ecuador) accounted for greater than 10% of such receivables.

In April 2016, Schlumberger announced that it would reduce its activity in Venezuela to align operations with cash collections as a result of insufficient payments received in recent quarters. As of September 30, 2017, Schlumberger's net accounts receivable balance in Venezuela was approximately \$0.5 billion, which excludes the \$0.2 billion of the promissory notes described below.

Included in *Receivables, less allowance for doubtful accounts* in the *Consolidated Balance Sheet* as of September 30, 2017 is approximately \$1.1 billion of receivables relating to Ecuador.

Schlumberger's receivables from its primary customers in Venezuela and Ecuador are not in dispute and Schlumberger has not historically had any material write-offs due to uncollectible accounts receivable relating to these customers.

During October 2017, Schlumberger reached an agreement to settle its overdue receivables in Ecuador.

During the second quarter of 2017, Schlumberger entered into a financing agreement with its primary customer in Venezuela. This agreement resulted in the exchange of \$700 million of outstanding accounts receivable for promissory notes with a three-year term that bear interest at the rate of 6.50% per annum. Schlumberger recorded these notes at their estimated fair value on the date of the exchange, which resulted in a pretax and after-tax charge of \$460 million. As a result, the cost basis of the promissory note is \$240 million. Schlumberger is accounting for the promissory notes as available-for-sale securities reported at fair value in *Other Assets*, with unrealized gains and losses included as a component of *Accumulated other comprehensive loss*. The fair value of the promissory notes, which is based on management's estimate of the pricing assumptions that market participants would use, was \$184 million at September 30, 2017. If Schlumberger were to conclude that these securities were other-than-temporarily impaired, it would be required to write-down its cost basis to fair value and record a corresponding charge to earnings.

Schlumberger's judgment regarding the collectibility of its receivables and promissory notes in Venezuela is sensitive to the political and economic conditions in the country. If conditions in Venezuela worsen, Schlumberger may be required to record adjustments to the carrying value of these assets.

Cash flow from operations for the nine months ended September 30, 2017 decreased by approximately \$0.8 billion as compared to the same period in 2016. This decrease was primarily driven by delays in collecting certain receivables combined with the working capital effects of the activity growth experienced during the nine months ended September 30, 2017. These effects were partially offset by the collection of a US federal tax refund of approximately \$685 million during the third quarter of 2017.

On March 24, 2017, Schlumberger and Weatherford announced an agreement to create OneStimSM, a joint venture to deliver completions products and services for the development of unconventional resource plays in the United States and Canada land markets. The joint venture will offer one of the broadest multistage completions portfolios in the market combined with one of the largest hydraulic fracturing fleets in the industry. Schlumberger and Weatherford will have a 70%/30% ownership of the joint venture, respectively. The transaction is expected to close in the fourth quarter of 2017 and is subject to regulatory approvals and other customary closing conditions. Under the terms of the formation agreement, Schlumberger and Weatherford will contribute all their respective North America land hydraulic fracturing pressure pumping assets, multistage completions, and pump-down perforating businesses. Subject to the terms of the agreement, Schlumberger will also make a cash payment of up to \$535 million to Weatherford. Schlumberger will manage the joint venture and consolidate it for financial reporting purposes.

In October 2017, Schlumberger announced that it and Torxen Energy have entered into a definitive agreement for the purchase of the Palliser Block located in Alberta, Canada, from Cenovus Energy, an integrated Canadian oil company, for cash consideration of

approximately \$1 billion. Under the agreement, which is subject to customary closing conditions, Schlumberger will be the majority non-operating owner and Torxen Energy will be the operator.

As of September 30, 2017, Schlumberger had \$5.0 billion of cash and short-term investments on hand. Schlumberger had separate committed debt facility agreements aggregating \$6.6 billion with commercial banks, of which \$4.2 billion was available and unused as of September 30, 2017. The \$6.6 billion of committed debt facility agreements included \$6.3 billion of committed facilities that support commercial paper programs. Schlumberger believes these amounts are sufficient to meet future business requirements for at least the next 12 months.

Borrowings under the commercial paper programs at September 30, 2017 were \$2.4 billion.

FORWARD-LOOKING STATEMENTS

This Form 10-Q as well as other statements we make, contain "forward-looking statements" within the meaning of the federal securities laws, which include any statements that are not historical facts, such as our forecasts or expectations regarding business outlook; growth for Schlumberger as a whole and for each of its segments (and for specified products or geographic areas within each segment); oil and natural gas demand and production growth; oil and natural gas prices; improvements in operating procedures and technology, including our transformation program; capital expenditures by Schlumberger and the oil and gas industry; the business strategies of Schlumberger's customers; the anticipated benefits of the Cameron transaction; the success of Schlumberger's SPM projects, joint ventures and alliances; future global economic conditions; and future results of operations. These statements are subject to risks and uncertainties, including, but not limited to, global economic conditions; changes in exploration and production spending by Schlumberger's customers and changes in the level of oil and natural gas exploration and development; general economic, political and business conditions in key regions of the world; foreign currency risk; pricing pressure; weather and seasonal factors; operational modifications, delays or cancellations; production declines; changes in government regulations and regulatory requirements, including those related to offshore oil and gas exploration; the inability to retain key employees; and other risks and uncertainties detailed in this third-quarter 2017 Form 10-Q and our most recent Form 10-K, and Forms 10-Q, and 8-K filed with or furnished to the Securities and Exchange Commission. If one or more of these or other risks or uncertainties materialize (or the consequences of any such development changes), or should our underlying assumptions prove incorrect, actual outcomes may vary materially from those reflected in our forward-looking statements. Schlumberger disclaims any intenti

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

For quantitative and qualitative disclosures about market risk affecting Schlumberger, see Item 7A, "Quantitative and Qualitative Disclosures about Market Risk," of the Schlumberger Annual Report on Form 10-K for the fiscal year ended December 31, 2016. Schlumberger's exposure to market risk has not changed materially since December 31, 2016.

Item 4. Controls and Procedures.

Schlumberger has carried out an evaluation under the supervision and with the participation of Schlumberger's management, including the Chief Executive Officer ("CEO") and the Chief Financial Officer ("CFO"), of the effectiveness of Schlumberger's "disclosure controls and procedures" (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")) as of the end of the period covered by this report. Based on this evaluation, the CEO and the CFO have concluded that, as of the end of the period covered by this report, Schlumberger's disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed in the reports that Schlumberger files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Schlumberger's disclosure controls and procedures include controls and procedures designed to ensure that information required to be disclosed in reports filed or submitted under the Exchange Act is accumulated and communicated to its management, including the CEO and the CFO, as appropriate, to allow timely decisions regarding required disclosure. There was no change in Schlumberger's internal control over financial reporting during the quarter to which this report relates that has materially affected, or is reasonably likely to materially affect, Schlumberger's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

The information with respect to this Item 1 is set forth under Note 11—Contingencies, in the Consolidated Financial Statements.

Item 1A. Risk Factors.

As of the date of this filing, there have been no material changes from the risk factors previously disclosed in Part 1, Item 1A, of Schlumberger's Annual Report on Form 10-K for the fiscal year ended December 31, 2016.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Unregistered Sales of Equity Securities

None.

Issuer Repurchases of Equity Securities

On July 18, 2013, the Board approved a \$10 billion share repurchase program for shares of Schlumberger common stock, to be completed at the latest by June 30, 2018. This program was completed during May 2017. On January 21, 2016, the Board approved a new \$10 billion share repurchase program for Schlumberger common stock. This new program took effect once the July 18, 2013 program was exhausted.

Schlumberger's common stock repurchase activity for the three months ended September 30, 2017 was as follows:

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Mine Safety Disclosures.

Our mining operations are subject to regulation by the federal Mine Safety and Health Administration under the Federal Mine Safety and Health Act of 1977. Information concerning mine safety violations or other regulatory matters required by section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act and Item 104 of Regulation S-K is included in Exhibit 95 to this report.

Item 5. Other Information.

Schlumberger completed the wind down of its service operations in Iran during 2013. Prior to this, certain non-US subsidiaries of Schlumberger provided oilfield services to the National Iranian Oil Company and certain of its affiliates ("NIOC").

Schlumberger's residual transactions or dealings with the government of Iran in the third quarter of 2017 consisted of payments of taxes and other typical governmental charges. Certain non-US subsidiaries of Schlumberger maintain depository accounts at the Dubai branch of Bank Saderat Iran ("Saderat"), and at Bank Tejarat ("Tejarat") in Tehran and in Kish for the deposit by NIOC of amounts owed to non-US subsidiaries of Schlumberger for prior services rendered in Iran and for the maintenance of such amounts previously received. One non-US subsidiary also maintains an account at Tejarat for payment of local expenses such as taxes. Schlumberger anticipates that it will discontinue dealings with Saderat and Tejarat following the receipt of all amounts owed to Schlumberger for prior services rendered in Iran.

At Schlumberger's 2017 Annual General Meeting of Stockholders, Schlumberger's stockholders voted on, among other matters, a proposal regarding the frequency of future advisory votes on executive compensation (say on pay). As previously reported, the Board views an annual advisory vote on executive compensation as the most appropriate option, and a majority of the votes cast on the

frequency proposal supported the Board's recommendation of holding an advisory vote to approve executive compensation on an annual basis. Accordingly, Schlumberger will hold an annual advisory vote to approve executive compensation.

Mine Safety Disclosure

The following disclosure is provided pursuant to Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act, which requires certain disclosures by companies required to file periodic reports under the Securities Exchange Act of 1934, as amended, that operate mines regulated under the Federal Mine Safety and Health Act of 1977.

The table that follows reflects citations, orders, violations and proposed assessments issued by the Mine Safety and Health Administration (the "MSHA") to indirect subsidiaries of Schlumberger. The disclosure is with respect to the three months ended September 30, 2017. Due to timing and other factors, the data may not agree with the mine data retrieval system maintained by the MSHA at www.MSHA.gov.
