News Release

SLB to Support Offshore Production Restoration for Brunei Shell Petroleum

Integrated execution model combines multiple disciplines to improve recovery from mature offshore assets

HOUSTON, Aug. 18, 2026 — Global energy technology company SLB (NYSE: SLB) today announced it has been awarded a contract by Brunei Shell Petroleum (BSP) to support production restoration from shut-in wells across multiple offshore fields.

The contract scope spans subsurface evaluation, well candidate selection, engineering and offshore execution. Project management, intervention services, monitoring, metering and marine logistics are integrated within a single coordinated execution model designed to support efficient production restoration.

"Building on our long collaboration in the region, this contract reflects a shared commitment to maximizing value from existing offshore resources," said Gokhan Yarim, senior vice president of Integration, SLB. "Together with BSP, we are combining SLB's production expertise and integrated execution capabilities to help restore production from shut-in wells, increase recovery from existing infrastructure and support BSP's long-term production objectives."

The project marks the first deployment of an integrated production restoration solution for Brunei Shell Petroleum, bringing together multiple disciplines, services and workflows to optimize recovery from mature offshore assets. The program also aligns with standard Well, Reservoir and Facility Management methodology through coordinated surveillance, engineering and intervention planning. This supports a structured approach to optimizing production while maintaining safe and efficient operations across mature offshore assets.

As operators increasingly prioritize maximizing recovery from existing assets, mature offshore fields present both opportunity and complexity. This award reflects a broader industry shift toward integrated production and recovery solutions that combine technical expertise, coordinated execution and production management to safely and efficiently improve asset performance.

Key Points:

- SLB has been awarded a contract by Brunei Shell Petroleum to support production restoration from shut-in wells across multiple offshore fields.
- The project marks the first deployment of SLB's integrated production restoration solution for Brunei Shell Petroleum, bringing multiple disciplines, services and workflows together through an integrated execution model.
- The integrated production restoration program combines well candidate selection, project management, engineering, intervention services, monitoring, metering and marine logistics within a single coordinated execution model.

- The project reflects a broader industry shift toward integrated production and recovery solutions that combine technical expertise, coordinated execution and production management to safely and efficiently improve asset performance.

About SLB

SLB (NYSE: SLB) is a global technology company that has driven energy innovation for 100 years. With a global footprint in more than 100 countries and employees representing almost twice as many nationalities, we work each day on innovating oil and gas, delivering digital at scale, decarbonizing industries, and developing and scaling new energy systems that accelerate the energy transition.
